PROJECTS

Personal Portfolio Website *HTML · CSS · JS(Basic) 2025*

- Designed and developed a fully responsive personal portfolio from scratch — no templates, no frameworks
- Implemented a clean layout using CSS Flexbox and Grid **FOR** cross-device compatibility
- Deployed

Railway Reservation System *python · 2026*

- A Flask-based web application for managing railway reservations. This system allows users to view available train schedules, book tickets, manage their bookings, and process cancellations with refunds.
- Check on GitHub - https://github.com/Evaliuna/railway_proj
-

DIUBusMate *java · 2025*

- A simple Java-based academic project designed to help students manage and access DIU bus-related information more conveniently.
- Check on GitHub - <https://github.com/Evaliuna/DIUBusMate>
